

NexAce CRM - Enterprise HR Operations

PROCESS OVERVIEW

This document specifies the lifecycle workflow for onboarding new employees within NexAce CRM, incorporating Admin-controlled HR Data Isolation, audit tracking of designated onboarding HR personnel, document upload & verification pipelines, and status transition gates.

END-TO-END WORKFLOW ARCHITECTURE

01 Employee Registration & Intake [EMPLOYEE / ADMIN]

- Employee accepts Workspace Invite or submits self-signup form.
- User account created in MongoDB with status: 'Pending'.
- documentsSubmitted defaults to false; account remains restricted.

02 HR Assignment & Scope Isolation [WORKSPACE ADMIN]

- Admin assigns Department, Job Title, and designated HR Manager (hrId).
- If 'HR Data Isolation' toggle is active, other HRs cannot see this employee.
- Scoped access ensures each HR manages only their assigned cohorts.

03 Checklist Creation & Audit Timestamp [DESIGNATED HR]

- HR initializes Onboarding Checklist (NDA, Offer Letter, IT Setup).
- System writes onboardedBy: { hrId, hrName, date } to User & Checklist.
- Admin can review which specific HR onboarded each employee at any time.

04 Document Requests & Upload Portal [HR & EMPLOYEE]

- HR requests required documents (ID Proof, Tax Forms, Certificates).
- Employee logs in; sees 'My Required Documents' with live statuses.
- Employee uploads files (PDF/IMG/DOCX) -> Status moves to 'Submitted'.

05 HR Document Verification & Toggle [DESIGNATED HR]

- HR inspects uploaded files; marks each document 'Verified' or 'Rejected'.
- HR flips the employee card toggle button to 'Docs: Confirmed'.
- System logs documentsConfirmedBy: { hrId, hrName, confirmedAt }.

06 Activation & Full Workspace Unlock [HR / ADMIN / SYSTEM]

- User status updated from 'Pending' to 'Active'.
- Onboarding checklist status automatically marked as 'Completed'.
- Full employee capabilities unlocked (Punch Clock, Sprints, Projects, Chat).

LIFECYCLE STATE & API SPECIFICATION

Stage	Actor	API Endpoint	Database Fields Updated	Governance & Security
Phase 1: Registration	Candidate / Admin	/api/auth/register /api/invite	User.status = 'Pending' documentsSubmitted = false	Restricted login; no project or payroll access until approved.
Phase 2: Assignment	Workspace Admin	/api/team/[id] /api/settings/hr-isolation	User.hrId = ObjectId Tenant.isolateHRData = boolean	Assigns HR cohort. If isolation active, other HRs cannot view employee.
Phase 3: Checklist	Designated HR	/api/hr/checklists	User.onboardedBy = { hrId, hrName, date } HROnboarding.items[]	Creates onboarding checklist items (NDA, contract, orientation).
Phase 4: Docs Upload	Employee	/api/hr/documents/upload	HRDocument.status = 'Submitted' HRDocument.fileUrl	Employee accesses portal to submit required credentials and proofs.
Phase 5: Doc Verification	Designated HR	/api/hr/documents /api/team/[id]	HRDocument.status = 'Verified' User.documentsSubmitted = true	HR validates submissions and flips confirmation toggle on employee card.
Phase 6: Activation	HR / Admin	/api/team/[id] /api/hr/checklists	User.status = 'Active' HROnboarding.status = 'Completed'	Unlocks attendance punch clock, sprints, chat, leaves, and deliverables.
